THE

BOTANICAL GAZETTE

EDITOR
JOHN MERLE COULTER

VOLUME LIX

JANUARY–JUNE, 1915

WITH TWENTY-ONE PLATES AND EIGHTY-SEVEN FIGURES

THE UNIVERSITY OF CHICAGO PRESS
CHICAGO, ILLINOIS

Published
January, February, March, April, May, June, 1915

Composed and Printed By
The University of Chicago Press
Chicago, Illinois, U.S.A.

TABLE OF CONTENTS

		PAGE
The morphology of *Araucaria brasiliensis* (with plates I–III)	*L. Lancelot Burlingame*	1
The archegonium of *Sphagnum subsecundum*. Contributions from the Hull Botanical Laboratory **199** (with plates IV–VII)	*George S. Bryan*	40
Additional evidence of mutation in *Oenothera* (with seventeen figures)	*Harley Harris Bartlett*	81
The embryo sac and embryo of *Striga lutea* (with plates VIII and IX)	*Margaret R. Michell*	124
The origin of the inflorescences of *Xanthium* (with plate X)	*Clifford H. Farr*	136
The visible effects of the Schumann rays on protoplasm	*W. T. Bovie*	149
Flower of *Adenocaulon bicolor* (with plates XI and XII)	*Jessie A. Ayres*	154
The coefficient of mutation in *Oenothera biennis* L.	*Hugo DeVries*	169
Growth studies in forest trees (with plates XIII and XIV and two graphs)	*H. P. Brown*	197
Extreme alterations of permeability without injury (with four figures)	*W. J. V. Osterhout*	242
The alpine and subalpine vegetation of the Lake Tahoe region (with four figures)	*F. J. Smiley*	265
On the male gametophyte of *Picea canadensis*. Contributions from the Hull Botanical Laboratory **200** (with plates XV–XIX and one figure)	*A. H. Hutchinson*	287
Studies in the genus *Bidens*. II. Contributions from the Hull Botanical Laboratory **201** (with three figures)	*Earl E. Sherff*	301
On the decrease of permeability due to certain bivalent kations (with eleven figures)	*W. J. V. Osterhout*	317
Branching in the Ophioglossaceae. Contributions from the Hull Botanical Laboratory **202** (with plates XX–XXI and six figures)	*Loren C. Petry*	345
Variations in respiratory activity in relation to sunlight (with ten figures)	*H. A. Spoehr*	366

37905

PAGE

The medullary rays of *Cedrus* (with seven figures) *M. A. Chrysler* 387

Microtechnical methods. Contributions from the Hull Botanical Laboratory **203** - - - *W. J. G. Land* 397

Effect of moisture content of a sandy soil on its nitrogen fixing power - - - *C. B. Lipman* and *L. T. Sharp* 402

A study of delayed germination in economic seeds. Contributions from the Hull Botanical Laboratory **204** (with one figure) - - - - - *Dean H. Rose* 425

Specific action of organic compounds in modifying plant characteristics; methyl glycocoll versus glycocoll (with four figures) - *Oswald Schreiner* and *J. J. Skinner* 445

The effect of some trivalent and tetravalent kations on permeability (with seven figures) - - *W. J. V. Osterhout* 464

Physiological isolation of types in the genus *Xanthium* (with seven figures) - - - *Charles A. Shull* 474

The origin and distribution of the family Myrtaceae *Edward W. Berry* 484

Growth and colloid hydratation in cacti (with two figures) - - - - - - - - - *Esmond R. Long* 491

BRIEFER ARTICLES—

Apogamy in *Nephrodium hertipes* - - - - *W. N. Steil* 254

Notes on orchids (with one figure) - - - *T. D. A. Cockerell* 331

Evidence for the general distribution of oxidases in plants - - - - - - - - - *G. B. Reed* 407

CURRENT LITERATURE - - - - - - - 57, 158, 256, 334, 410, 498

For titles of book reviews see index under author's name and reviews

Papers noticed in "Notes for Students" are indexed under author's name and subjects

DATES OF PUBLICATION

No. 1, January 27; No. 2, February 17; No. 3, March 17; No. 4, April 15; No. 5, May 15; No. 6, June 17.

ERRATA

Vol. LIX

P. 86, line 7 from top, for *Oenothera*×*Onagra* read *Oenothera* § *Onagra*

P. 113, line 12 from top, for 235:1 read 255:1.

In the paper by Dr. LAETITIA M. SNOW on "The diaphragms of water plants," appearing in the December number of this journal (BOT. GAZ. **58**:496–517. 1914), an accidental exchange of figures occurred. The corrections are as follows:

Pp. 498 and 505. The figures appearing on these pages should be interchanged, and the legends read as follows:

FIG. 1.—Flax seedling: longitudinal section through hypocotyl: *c*, ordinary cortical cells; cells are elongating in the direction of food current passing to meristem beyond *m*; ×100.

FIG. 7.—*Scirpus validus:* longitudinal section of stem: diaphragm varying in thickness; cross-bundle (*b*) at edge of diaphragm establishing connection (*c*) with a longitudinal bundle beyond section; cells stippled to distinguish from spaces; *h*, cut arms of cells; ×100.

P. 511. The figures appearing on this page should be interchanged; the legends should remain as printed.
